

Weiqi Wang WANW7D1903

My nickname is Sam. My age is 19, prefer be pronounced "he", I'm in Vancouver these days.

Office hour ~~preffer~~ preferred: Thursdays noon

I understand and is able to use PDF and Microsoft Word.

Nice to see you again, Dr. Kelleher. I used to attend this course before, but due to the device problem, I didn't finish the course. This time I have already prepared all the things in need, and going to be success. In the last year, I was taking care to my grandfather for almost a whole year. He was confirmed as cancer, seriously. My family held his funeral in November. He was a lovely old guy, sometimes obstinate and willful. Maybe this is the character of every old man in the world?

As to the study, I choose this course once again is to pass UTP I. I have learned most of the courses, but to now I'm increasing my CGPA. ~~Re~~ My interest courses are mainly computer science, math and economic, but I ~~don't~~ have these courses in this semester. I'm developing an app for phone, helps meeting classmates in online courses, and in this semester I will continue working.
